

# 2020 Market Highlights

## Summary

2020 was an extraordinary year for everyone, perhaps rather too eventful. The Covid-19 pandemic, the US presidential election, Brexit, the resignation of Japan's prime minister Shinzo Abe and increased tension between the US and China created vast economic uncertainty and a flood of pessimistic forecasts. In March we saw market volatility levels comparable only to those of the Great Financial Crisis of 2008 and for months on end, normal working, travel, and leisure arrangements were severely disrupted.

When we look at the data, the magnitude of the shock is evident, particularly in March. But what is remarkable is that despite the exceptional circumstances and even during the worst days of the crisis, markets remained open and functioning. In addition, after the peak in uncertainty observed in March, markets quickly recovered. By the end of July, most indicators registered a quick reversal to the activity levels seen before the pandemic, reflecting a strong confidence in the markets and in their role in supporting the economy.

Towards the end of the year, the news of the development and approval of several Covid-19 vaccines, the final agreement between the UK and the EU, and the outcome of the US elections seemed to have boosted the confidence of investors and issuers, driving markets to end the year on a high note.

## Key Indicators

### Equities

- After a sharp drop (20.7%) in Q1, domestic market capitalisation quickly recovered, reaching pre-pandemic levels by the end of Q2.
- In November 2020, global market capitalisation passed the 100 USD trillion mark for the first time, ending the year at 109.21 USD trillion, up 19.7% when compared with the end of 2019.
- While there was an overall 1.1% increase in the number of listed companies relative to 2019, EMEA accumulated three consecutive years with a contracting trend.
- In 2020, equity markets saw record-high levels of value traded (53.7%) and volumes (56.0%) compared with the previous year.
- After reaching a peak in March, higher value-traded and volumes became the new normal, persisting through the year: in Q4, the number of trades stood at 9.54 billion and the value of trades amounted to 34.81 USD trillion.
- When compared with 2019, the number of new listings through IPOs and investment flows through IPOs increased significantly, by 25.7% and 36.8% respectively. There was a 1.1% increase in the number of listed companies.
- These numbers reflect how exchanges have continued to play an active and fundamental role in supporting their underlying economies even during this uncertain year.

### Exchange traded derivatives (ETDs)

- Derivatives trading rose for almost all contract types, and in all regions. Options trading increased more than futures trading. Overall, in 2020, exchange traded derivatives volumes were up 43.0% when compared with 2019, reaching a record 46.28 billion contracts traded.
- In 2020, ETDs saw significant increases in volumes, mainly in single stock futures (99.5%) and ETF options (77.6%), the former being driven by the Americas (1,202.0%), in particular by B3-Brasil Bolsa Balcão.

# Cash equity<sup>1</sup>

## Domestic market capitalisation

After a sharp drop of 20.7% in Q1, **domestic market capitalisation** quickly recovered, reaching pre-pandemic levels in the following months.

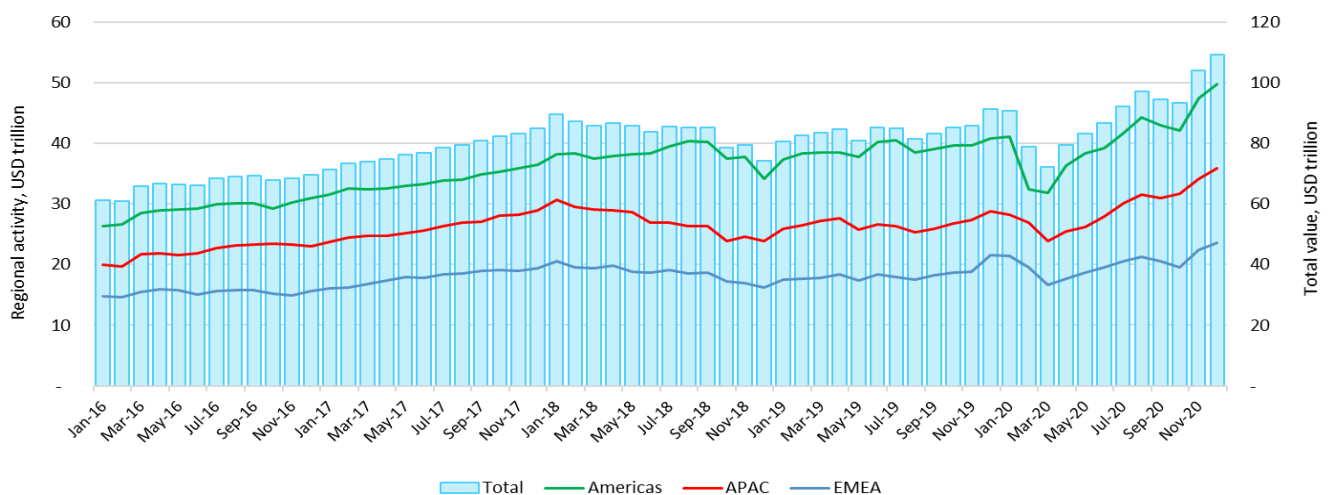

In November 2020, markets added **10.90 USD trillion**, surpassing the **100 USD trillion** mark for the **first time**.

At the end of 2020, **market capitalisation** was up by **19.7%** when compared to the end of 2019, reaching **109.21 USD trillion**.

All regions registered an increase compared with 2019: 21.7% in the Americas, 24.3% in APAC and 9.7% in EMEA. In the Americas, Nasdaq and NYSE added 46.6% and 12.5% respectively. In APAC, Shanghai Stock Exchange added 36.6%, Hong Kong Exchanges and Clearing 25.1%, Japan Exchange Group 8.5% while in the EMEA, Nasdaq Nordic and Baltic increased by 30.9%, SIX Swiss Exchanges by 9.1% and Deutsche Börse by 8.9%.

**QoQ:** Domestic market capitalisation was up 15.7% compared to Q3 2020. The uptick was similar in all three regions: Americas and APAC each grew by 15.9%, while EMEA by 14.9%. This increase largely took place in November when global markets saw a 11.7% uptick in market capitalisation.

Chart 1: Market capitalisation

<sup>1</sup> Throughout the report, in addition to the comparison with 2019, we report the comparison of Q4 2020 with Q4 2019 (**Year-on-Year, YoY**), and the comparison of Q4 2020 with Q3 2020 (**Quarter-on-Quarter, QoQ**), where relevant. All the results are aggregated at regional level: the Americas, the Asia-Pacific (APAC) and Europe, Middle East and Africa (EMEA). The full set of data is presented in the tables at the end of the report.

## Trading value and volumes

Compared to 2019, 2020 saw record-high levels of value traded (53.7%) and volume traded (56.0%), with 137.63 trillion USD traded and 38.02 billion trades globally.

March was the month with the highest trading activity in 2020, with 11.5% of the value traded and 10.8% of the volumes traded during 2020 being traded in March.

But higher volumes and value traded persisted through the rest of the year.

In 2020, Electronic Order Book (EOB) **value traded** saw significant annual increases in all regions: the Americas by 58.8%, APAC by 55.8%, and the EMEA region by 26.2%, compared to the previous year.

With regards to **volumes**, the highest increase in the number of trades in equities took place in EMEA (68.0%) and Americas (67.2%), while APAC registered a 49.7% increase.

**YoY:** In Q4 2020 the value of trading registered an increase of 57.4% compared with Q4 2019. There was also a 60% increase in the number of trades.

**QoQ:** In Q4 2020, the **value of trades** in equities amounted to 34.81 trillion USD. This represents a 3.5% decrease globally when compared to Q3 2020, due to the downtick registered by APAC (16.1%), while the Americas and EMEA reported increases of 4.1% and 17.2%.

The **number of trades** in equities stood at 9.54 billion in Q4, which represents a 7.8% downtick on the previous quarter, entirely due to a drop in APAC (12.3%). The positive trend in the Americas and EMEA of 1.0% and 2.8% respectively was not enough to compensate for APAC's performance.

Chart 2: Trading value through Electronic Order Book (EOB)

Chart 3: Number of trades

## Listed Companies

There was a **1.1% increase** in the number of **listed companies** with respect to 2019. While positive, this is the lowest increase in the last four years

EMEA accumulates three years with a contracting trend

This result is driven by the APAC region, which saw a 2.8% rise in the number of listed companies, and the Americas (1.1%). On the other hand, we saw a contraction in the number of listed companies in the EMEA region by 1.6%, the largest annual decrease in the last three years.

Chart 4A: Number of listed companies, 2020

Char 4B: Historical annual increases/decreases

## New listings, investment flows and IPO activity

Despite the uncertainty brought by the pandemic, there was an increase of **25.7%** in **new listings through IPOs** relative to 2019, which highlights the role that exchanges play in funding the real economy, of particular importance during challenging times.

Compared with Q4 2019, the global number of IPOs in Q4 2020 also significantly increased (**36.4%**).

The average size of an IPO increased to 187.06 million USD from 171.93 million USD in 2019.

The increase in **new listings** was due to an uptick in the three regions: Americas (20.6%), APAC (21.2%) and EMEA (55.2%).

In 2020 the APAC region had the lion's share of both global IPO listings (63.6%) and investment flows (53.7%). **Shanghai Stock Exchange** recorded the highest number of IPOs globally (234), followed by **Nasdaq-US** (184) and **Shenzhen Stock Exchange** (161).

There was a total of 1,485 **new companies listed** on stock markets through IPO during 2020. This is 25.7% more than in 2019.

**QoQ:** Q4 2020 witnessed an increase in **new listings** through IPOs of 12.2% (to 543) compared with the previous quarter.

In the last five years only Q4 2017 witnessed a slightly higher number of IPOs (544).

In 2020, IPOs were concentrated in the second half of the year. December 2020 witnessed an exceptional 137% increase in the **number of IPOs** compared with the previous month, with all three regions more than doubling: the Americas (146%), APAC (133.8%) and EMEA (140.7%).

Chart 8: Number of IPOs

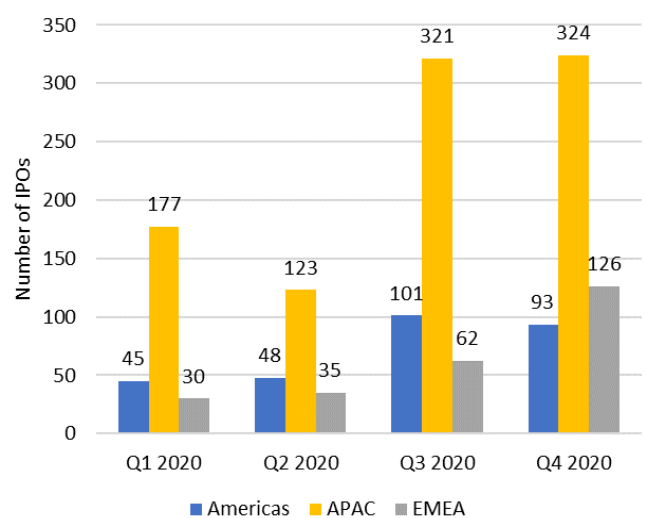

Chart 9: Number of IPOs by quarter and region

**Non-IPO listings were up 30.6% compared with 2019.**

The increase is mostly driven by the performance in APAC (where 90% of non-IPO listings took place), which saw a pronounced increase (57.8%), totalling 1,223 non-IPO listings in 2020. The Americas also experienced a 19% increase, while EMEA registered a 79.7% decline.

**YoY:** Compared to Q4 2019, in Q4 2020 the **non-IPO listings** went up by 35.1%, due to Americas and APAC regions which increased by 129.4% and 63.8% respectively, while EMEA declined by 89.6%.

**QoQ:** In Q4 2020, **non-IPO listings** went up by 17.12% compared to Q3 2020, with all regions having a positive trend: the Americas (62.5%), APAC (13.6%) and EMEA (40%) respectively.

Chart 7: New listings (IPO and non-IPO)

**Investment flows through IPOs increased by 36.8%, when compared with 2019, and by 22.8% when compared with Q4 2019.**

In December 2020, the **capital raised through IPOs (44.78 billion USD)** was the highest monthly amount raised in the last five years.

The increase was due to large increases in Americas (82.3%) and APAC (49.7%), while EMEA fell by 31.3%.

Most of the growth was seen during the second half of the year, with Q4 characterised by exceptional performance.

**QoQ:** In Q4 2020, we noticed an increase of 9.1% in the investment through IPO compared with the previous quarter (which in turn grew by 134.1% on Q2 2020),

**YoY:** There was an even more pronounced uptick of 22.8% as compared with Q4 2019.

Chart 5: IPO activity

Chart 6: Investment flows (IPO and non-IPO)

Investment flows through already listed companies went up by 31.8% compared to 2019, totalling 650.7 billion USD over the course of the year.

This increase was due to an increase in all regions: in Americas (16.1%), APAC (38.1%) and EMEA (34%). These numbers suggest that already listed companies conspicuously rely on stock markets to widen their growth opportunities.

**QoQ:** Compared with the previous quarter, there was a 4.3% global increase, reaching 176.9 billion USD. While the Americas and EMEA registered increases of 7.3% and 52.6% respectively, APAC region decreased by 13.8%.

**YoY:** Measured against Q4 2019, Q4 2020 saw a positive trend in investment flows through already listed companies by 21.8%, with all regions registering a rise: the Americas (2.8%), APAC (16.2%) and EMEA (49.4%).

## Notable IPOs:

### Americas

While Americas region 2020 IPO listings rose by 20.6% compared with 2019, investment flows increased by a dramatic 82.3% in the same period, thanks to some notable IPOs. In the second half of the year Brazilian hospital company **Rede D’Or (B3 – Brasil Bolsa Balcão)**, raised 1.66 billion USD, making it one of the biggest IPOs in Brazil’s history. **Nasdaq–US** hosted **Airbnb**, a vacation rental company, which raised 3.49 billion USD, the largest IPO in the Americas in 2020. The same exchange listed **Eastern Bank** (1.79 billion USD), **Maravai**, a biopharmaceutical company (1.62 Billion USD), **GoodRX Holdings Inc**, a company that finds users prescription drugs at a discount (1.14 billion USD), **Wish**, a discount marketplace (1.10 billion USD), Chinese electric vehicle maker **Li Auto Inc** (1.09 billion USD), **Sotera Health Company** (1.07 billion USD) and **Array Technologies Inc**, a solar energy technology company (1.05 billion USD).

**NYSE’s** large listings included **Snowflake Inc**, a software company, which raised 3.36 billion USD, **KE Holdings Inc**, a China-based real-estate brokerage and technology company (2.12 billion USD), **Rocket Companies**, the parent company of Quicken Loans and Rocket Mortgage (1.80 billion USD), **Dun & Bradstreet Holdings Inc**, a global provider of business decisioning data and analytics (1.72 billion USD), **XPeng Inc**, a smart electric vehicle company (1.50 billion USD) and **Unity Software Inc** (1.30 billion USD).

### APAC

In H2 2020, the APAC region managed to retain its status as the host of the largest IPO in the world, with the July listing of **Semiconductor Manufacturing International Corporation** on **Shanghai Stock Exchange**, which raised 6.64 billion USD. The same exchange hosted **China International Capital Corporation Ltd** (2.01 billion USD).

**Hong Kong Exchanges and Clearing**, which hosted the largest IPO in the world in the first half of the year (**JD.com**), listed **JD Health International Inc** in December, which raised a significant 4 billion USD. The same exchange hosted **Yum China Holdings Inc**, a fast-food restaurant company (2.23 billion USD), **China Bohai Bank Company Ltd** (2.05 billion USD), **GDS Holdings Ltd**, an IT service management company (1.92 billion USD), **Evergrande Property Services Group Ltd** (1.84 billion USD), **China Resources Mixc Lifestyle Services Ltd**, a residential property management company (1.82 billion USD), **Hangzhou Tigermed Consulting Co**, a management consulting company (1.59 billion USD), **New Oriental Education & Technology Group**, a provider of private educational services (1.50 billion USD), **ZTO Express (Cayman) Inc**, an express delivery services company (1.46 billion USD), **Shimao Services Holdings Ltd**, a residential property managers company (1.28 billion USD), **Blue Moon Group Holdings Ltd**, a household care company (1.27 billion USD), **Nongfu Spring Co**, a beverage company (1.24 billion USD), **Sunac Services Holdings Ltd**, a property management service (1.19 billion USD) and **Smoore International Holdings Ltd**, a company offering vaping technology solutions (1.06 billion USD). In H2 2020, **Hong Kong Exchanges and Clearing** listed the highest number (14) of IPOs over 1 billion USD. In October **The Stock Exchange of Thailand** hosted the **SCG Packaging Public Company Ltd**, which raised 1.25 billion USD. **ASX Australian Securities Exchange** listed **Dalrymple Bay Infrastructure Ltd** which raised 1 billion USD in December.

### EMEA

2020 IPO listings in EMEA registered an uptick of 55.2%, while investment flows fell by 31.3% compared with the previous year, the only region to experience a decrease in investment flows (due to the listing of an unusually large IPO the previous year: Saudi Aramco).

In H2 2020 **LSE Group** was the host of the largest IPO in EMEA, **THG Holdings**, a British e-commerce company, which raised 2.43 billion USD, **China Yangtze Power Co**, a utilities company (2 billion USD), **Conduit Holdings Ltd**, an insurance company (1.08 billion) and **Joint Stock Company Kaspi.kz**, which provides online transaction software (1 billion USD).

**Allegro.eu SA**, which operates a shopping e-commerce platform, raised 2.32 billion USD, hosted by **Warsaw Stock Exchange**, which ranked second in Europe in terms of IPO investment flows.

**Nordnet AB**, a pan-Nordic digital savings and investments platform, listed on **Nasdaq Nordics and Baltics**, raised 1.08 billion USD in November, while **Moscow Stock Exchange** hosted **Ozon**, a Russian e-commerce company (1.01 billion USD) which was also listed on **Nasdaq-US**.

Chart 10: Capital raised through IPO by region

Chart 11: Capital raised through IPOs

## ETFs

The value and volume traded in ETFs saw an increase during Q4 2020 by 12.3% and 4.6% respectively.

Overall in 2020, value and volumes of trades in ETFs were up 42.3% and 73.6%, respectively, relative to 2019.

The increase in value was driven by a positive performance across all regions. It was up 37.0% in the Americas,<sup>2</sup> 89.0% in APAC, and 95.9% in the EMEA region.

The same trend is apparent in the number of trades in ETFs: EMEA region saw the highest increase (334%), followed by APAC (187.6%), and by the Americas (47.3%), which is the largest market in terms of ETF trading activity (70.6% share).

Last year, the overall volume and value of ETFs traded

reached its highest in Q1 2020, with 625.53 million trades generating 9.87 trillion USD.

**QoQ:** As compared with Q3 2020, ETF value traded was 12.3% higher globally, with Americas and EMEA showing an uptick of 14.0% and 25.7%, respectively, while APAC saw a 2.1% decrease. The Americas is the region where most trading is concentrated (84.2% share).

At the end of 2020, market capitalisation of Exchange Traded Products (ETPs) was nearly 7.8 trillion USD. Americas represented the lion’s share, with nearly 5.8 trillion USD accounting for 74.35% of the total. EMEA followed (just over 1 trillion USD, 13.14% of the total), and APAC ranked third (980 billion USD, 12.61% of the total).

Over the course of 2020, ETP market capitalization was growing, and as compared with January 2020 ETP market capitalisation was 10.21% higher globally. This performance is due to a growth in all regions: Americas saw a 7.01% rise, APAC a staggering 35.61% increase, and EMEA recorded 9% growth. This positive trend was observed despite the effects of the pandemic’s first wave in Europe (March 2020). During that month, ETP market capitalisation shrank globally by 3.38%, due to a decrease in all regions (Americas: -2.3%; APAC: -3.3%; EMEA: -10.1%).

**QoQ:** Q4 2020 saw growth compared with Q3 2020, with ETP market cap rising by 3.17% globally thanks to a positive performance in all regions, and especially in APAC (Americas: 2.33%; APAC: 11.68%; EMEA: 0.67%).

In Q4 2020, the number of **ETFs listed globally** increased by 2.8% on Q3 2020 and growth characterised all regions. The Americas grew by 4.5%, APAC by 2.7% and EMEA by 0.5%.

<sup>2</sup> ETF data excludes NYSE value traded and volume traded from Jul 2020–present. Number of ETFs listed and ETP market capitalisation, include NYSE figures.

# Exchange-traded derivatives

Investors heavily relied on derivatives markets to hedge their positions, aiming to cope with the heightened uncertainty posed by the global pandemic.

ET derivatives volumes were **up 43%** when compared with 2019, reaching a record **46.28 billion contracts** traded.

Derivatives trading rose for almost all contract types and in all regions.

In 2020, options increased 48.6%, reaching 20.96 billion contracts, while futures increased 38.6% to 25.32 billion contracts traded.

The increase was driven by all contracts types except interest rate derivatives and ETF futures.

Chart 12: Derivatives total volumes

## Equity derivatives

Single stock options volumes were **up 68.2%** in 2020 compared to the previous year.

The increase was mostly driven by an 80.4% growth in the Americas, which represents 88.8% of the global volumes, and by APAC, which saw 16.2% growth in contracts traded. In EMEA volumes saw a more modest increase of 0.9%.

**YoY:** Single stock options volumes in Q4 2020 were up by 81.5% as compared to Q4 2019. The increase was driven by

all regions: the Americas (91.1%), APAC (41.8%) and EMEA (6.6%).

**QoQ:** Relative to Q3 2020, volumes were 12.5% higher, all regions recording an uptick: the Americas (12.4%), APAC (3.0%) and EMEA (35.3%).

Chart 13: Single stock options trading

Single stock futures volumes recorded a spectacular **99.5% increase** in 2020 compared with 2019, driven by B3 – Brasil Bolsa Balcão in the Americas.

Single stock futures<sup>3</sup> were the fastest growing across all derivatives. The increase was due to a large uptick in the Americas (1,202%), driven by **B3-Brasil Bolsa Balcão**, and to increases in APAC (54.2%) and EMEA regions (115.4%).

**YoY:** volumes in Q4 2020 were 191.4% higher than in Q4 2019. The increase was across all regions: the Americas saw the largest increase (2,078.2%), due to the exceptional B3 - Brasil Bolsa Balcão’s performance, although the Americas are the smallest market; APAC saw an 86.8% increase, while the EMEA region, the largest market, saw a 214.7% increase.

**QoQ:** As compared to Q3 2020, volumes were 38.7% higher, with all regions characterised by growth.

Chart 14: Single stock futures trading

<sup>3</sup> Includes Matba Rofex from Jan 2019-present

**Stock index options volumes rose by 42.3% in 2020 compared with 2019.**

Stock index options<sup>4</sup> accounted for the largest share by volumes traded among all derivatives. The APAC region, which accounts for 86.2% of total volumes, increased by 51.6%. In particular, the **National Stock Exchange of India had the largest volumes (6.67 billion) in 2020.**

**YoY:** volumes in Q4 2020 were 63.1% higher than in Q4 2019. While APAC showed a significant increase (77.7%), the contracts traded in

the Americas and EMEA declined by 6.7% and 1.6% respectively.

**QoQ:** As compared with Q3 2020, volumes were 15.9% higher, with all regions increasing.

Chart 15: Stock index options trading

**Stock index futures volumes increased by 59.9% in 2020 compared with 2019.**

All regions recorded significant increases in stock index futures volume<sup>5</sup> compared with 2019: the Americas 85.3%, APAC 30.0% and EMEA region 19.9%.

**YoY:** volumes in Q4 2020 rose by 53.0% when compared with Q4 2019. All regions saw an increase in trading activity: in the Americas it grew by 79.6%, in APAC by 18.7% and in EMEA region by 6.4%.

**QoQ:** As compared with Q3 2020 volumes were 1.1% lower, with all regions declining, except EMEA.

Chart 16: Stock index futures trading

<sup>4</sup> Includes India International Exchange from Jan 2019–present. Excludes International Securities Exchange from Jul 2020 –present.

<sup>5</sup> Includes India International Exchange from Jan 2019–present.

ETF derivatives volumes traded were up 71.4% in 2020 compared with the previous year.

This is largely due to the North American market, where most ETF derivatives trading takes place.

**ETF options** volumes concentrated almost exclusively in the Americas region, in Q4 2020 were 55.7% higher than in Q4 2019, and 1.7% lower than in Q3 2020.

**ETF futures**<sup>6</sup> volumes in Q4 2020 were 32.9% lower than in Q4 2019, and 12.5% lower than in Q3 2020.

## Currency derivatives

Currency options volumes were up 16.6%, compared to 2019.

The increase was driven by APAC (19.7%), where the bulk of the volumes are traded, and EMEA (0.6%), while Americas recorded a 26.4% decline.

**YoY:** volumes in Q4 2020 were 28.8% higher than in Q4 2019. This was due to APAC and EMEA regions, which saw volumes increasing by 32.1% and 10.4% respectively, while the Americas declined by 30.4%.

**QoQ:** As compared with Q3 2020, volumes were 0.31% higher, a result driven by EMEA (2.0%) and APAC (0.25%), while in the Americas volumes fell (2.9%).

Chart 17: Currency options trading

Currency futures volumes were up 35.8%.

All regions recorded a positive trend: the Americas (29.3%),<sup>7</sup> APAC (19.6%) and EMEA (66.0%).

**YoY:** Volumes in Q4 2020 were 70.5% higher than in Q4 2019, with all regions witnessing an increase in trading activity: the Americas

(72.8%), APAC (31.8%) and EMEA (116.7%).

**QoQ:** As compared with Q3 2020, volumes were 5.4% higher, due to the uptrend in APAC and EMEA of 8.2% and 16.0% respectively, while the Americas saw a downtick of 4.6%.

<sup>6</sup> Excludes Johannesburg Stock Exchange from Jul 2020–present.

<sup>7</sup> Includes Bolsa y Mercados Argentinos currency futures volumes from Jun 2019–present.

Chart 18: Currency futures trading

## Interest rate derivatives

Interest rate options volumes were **down 23.8%** in 2020 compared with 2019.

The decrease in volumes was registered in all regions: the Americas (24.0%), APAC (61.0%) and EMEA (22.1%).

**YoY:** volumes in Q4 2020 were 22.2% lower than in Q4 2019. All regions saw a decrease in trading activity: in Americas (the largest market) contracts traded fell by 19.3%, in APAC by 82.8% and in EMEA by 32.8%.

**QoQ:** As compared with Q3 2020, volumes were 32.1% higher, entirely due to the Americas which saw a significant uptick of 42.5%, while in APAC and EMEA volumes fell 23.2% and 1.9% respectively.

Chart 19: Interest rate options trading

Interest rate futures volumes were **down 9.5%** compared to 2019.

The downtick in volumes was driven by all regions: Americas (11.1%), APAC (6.9%) and EMEA (6.1%).

**YoY:** volumes in Q4 2020 were 13.1% lower than in Q4 2019 which was caused by a decrease in trading activity in the Americas and APAC, where contracts traded declined by 18.0% and 15.8% respectively, while in EMEA the volumes increased by 1.9%.

**QoQ:** Compared with Q3 2020, volumes were 6.3% higher, entirely due to the Americas, which recorded an increase of 11.0%, while APAC and EMEA declined by 5.6% and 0.5% respectively.

Chart 20: Interest rate futures trading

## Commodity derivatives

Commodity options volumes rose by 24.8% relative to 2019.

Volumes in APAC and the Americas rose by 146.5% and 2.5% respectively, while EMEA declined by 1.4%.

**YoY:** Volumes were 38.4% higher than in Q4 2019. This was due to a rise in the Americas (18.7%), where the bulk of contracts are traded, and APAC (154.3%), while EMEA region contracts trading decreased by 24.9%.

**QoQ:** As compared with Q3 2020, volumes were 17.2% higher, with all regions witnessing a positive trend.

Chart 21: Commodity options trading

Commodity futures, which account for 96.5% of the volumes of commodity derivatives, rose by 37.0%.

Growth<sup>8</sup> was driven by upticks in all regions: in the Americas by 0.38%, in APAC by 51.1% and in EMEA by 23.1%.

**YoY:** The growth in volumes compared with Q4 2019 was due to the growth in APAC region (69.0%), where the bulk of contracts are traded, and in EMEA (11.4%), while the Americas saw a decline of 7.7%.

**QoQ:** Compared with Q3 2020, volumes were 5.9% higher, due to APAC (7.6%) and EMEA (4.7%). Americas saw a decrease of 4.0%.

Chart 22: Commodity futures trading

<sup>8</sup> Includes National Stock Exchange of India from Jan 2019–present. Excludes Indonesia Commodity and Derivatives Exchange from Jun 2019–Dec 2020.

## Summary of the methodologies adopted for the 2020 report

All data contained in the following equity market tables include the Main/Official market and the Alternative/SME markets supervised and regulated by the Exchange.

### Domestic Market Capitalisation

The market capitalisation figures include:

- shares of listed domestic companies;
- shares of foreign companies which are exclusively listed of an exchange, i.e. the foreign company is not listed on any other exchange;
- common and preferred shares of domestic companies;
- shares without voting rights.

The market capitalisation figures exclude:

- collective investment funds;
- rights, warrants, ETFs, convertible instruments;
- options, futures;
- foreign listed shares other than exclusively listed ones;
- companies whose only business goal is to hold shares of other listed companies, such as holding companies and investment companies, and regardless of their legal status;
- companies admitted to trading (companies admitted to trading are companies whose shares are traded at the exchange but not listed at the exchange).

- **Australian Securities Exchange:** including investment funds.
- **BME Spanish Exchanges:** including investment companies listed (open-end investment companies) that differ from investment funds included in Table 1.3 because of their legal status and that cannot be distinguished from other listed companies.
- **Bolsa de Valores de Lima:** Includes 26 foreign companies with shares negotiated under a special modality.
- **Borsa Istanbul** market capitalisation/listed companies figures include investment companies and holdings.
- **Deutsche Börse:** excluding the market segment “Freiverkehr” (unofficial regulated market).

- **Euronext:** includes Belgium, Ireland, France, the Netherlands, and Portugal.
- **Johannesburg Stock Exchange:** figures include the market capitalisation of all listed companies, but exclude listed warrants, convertibles and investment funds.
- **Korea Exchange:** including Kosdaq market data.
- **Nasdaq Nordic Exchanges:** includes Copenhagen, Helsinki, Iceland, Stockholm, Tallinn, Riga and Vilnius Stock Exchanges.
- **NSE India:** including “Emerge” market data.
- **Singapore Exchange:** market capitalisation includes domestic listings and a substantial number of foreign listings, defined as companies whose principal place of business is outside Singapore. Inactive secondary foreign listings are excluded.
- **Stock Exchange of Mauritius:** from Aug. 2006, data includes Development & Enterprise Market.
- **TMX Group:** includes companies listed on TSX Venture.

### Disclaimer:

While the World Federation of Exchanges (WFE) makes every effort to check that the data are accurate and complete, it does not accept liability for any errors or omissions. The WFE shall not be liable for any claims or losses of any nature arising directly or indirectly from use of the data.

When monthly data for an exchange is not available and the missing data is not considered to have a significant impact on aggregate results, the WFE team might perform an estimation based on historical data.

Please note that some technical footnotes available in the monthly statistics published by the WFE are not available here in the raw data uploaded with the query tool.

In order to explain some breaks in the time series or other statistical issues, the user will probably have to consult those footnotes in the monthly tables published by the WFE.

Statistics definitions are also publicly available on the [WFE website](#).

For reproduction, citation, distribution and transmission of any data please contact the [Secretariat](#). It is otherwise strictly prohibited. The WFE must always be quoted when the statistics are used by a third party.
